

Sanparrel colour availability

Sanparrel PVC-u sheet is available on the Rapid Response programme in 18 colours on a 24 hour lead time. Sanparrel rubrails, kickplates and pushplates are produced from stocked Sanparrel sheet and production lead times may apply. Lead times can be checked with the Sales Order Department on 01625 428922 prior to ordering.

Light Reflectance Values (LRVs) - all Gradus InPro wall protection colours have been measured for light reflectance and the value is given below each colour. An LRV is a value given to a surface to denote the amount of light reflected, and can be used to measure colour and contrast in products/surfaces to determine whether or not a suitable contrast has been achieved between surfaces.

In order to achieve a suitable contrast between different surfaces, Project Rainbow and Approved Document M (ADM) 2004 of The Building Regulations 2000 recommend that there is at least a 30 point difference in the LRVs of the two surfaces.

The LRVs of all Gradus wall protection colours have been measured in accordance with the new British Standard BS8493:2008 using the CIE Y value, and full test reports are available on request.

What do the colour & contrast guidelines mean for specifying Sanparrel?

ADM 2004: 'All door opening furniture contrasts visually with the surface of the door.' (See pages 70 and 72 for further details).

Colour, Contrast & Perception (Project Rainbow): 'Finger plates and kick plates on doors should be sufficiently different in colour to the door.'
