

# 11. Door Closers

## Performance, Style & Choice

The door closer is an important link in the control of fire and smoke, and in practice could help to save lives. Product ranges from basic standard fixed size to selectable sizes with options of backcheck, delayed action and electro-magnetic door closures.

### “Swing Free”/“Hold-Open” Door Closer

The electro-magnetic door control system provides the solution to meeting the requirements of the Disability Discrimination Act and the need for fire safety. Available as “swing-free” or “hold-open” function - ideal for use in areas used by the elderly or infirm. They can be set to hold the door open at any angle between 70° and 100°, or to swing freely until the fire alarm is activated or the power fails

### Door Closer Configuration

#### Size 3
