On-Site Survey of ironmongery requirements

When planning upgrades, renovation or extensions it is essential to ensure that the correct ironmongery is implemented on site. Universal Hardware Direct UK Ltd will conduct a site survey to determine ironmongery requirements and will generate a report to include a schedule of required hardware.

Risk Assessment

Independent Risk Assessment allows an unbiased evaluation of risks to be carried out. Our Consultancy services offer practical advice on architectural ironmongery and security implementation within the Care and Nursing Home environment.

Bedroom Lock Installation

Universal Hardware Direct is able to provide hardware only or combine with a turnkey supply and installation service. Our cost-effective solution lets you take advantage of our installation expertise while your staff stays focused on what they know best.

Web Site Design

Universal Web Design specialises in the design and implementation of web sites for small or medium size business.

As a full service, Universal Web Design provides all the services you need to implement and maintain an effective website, from beginning to end. We can suggest and create a new custom website, or analyze and enhance an existing site; we can design, manage and host your website, at an affordable price.

The starter package includes a design to your specification and provides the following features:

- ◆ 5 HTML pages.
- ◆ Inclusion of existing company logo, graphics, images and colour scheme.
- ◆ Hosting of web site for one year.
- ◆ A Web base enquiry form to the specifications of your choice.
- ◆ Search engine submission.

* Optional on-going support available
