

# 5. Window Restrictors Solutions that set new standards

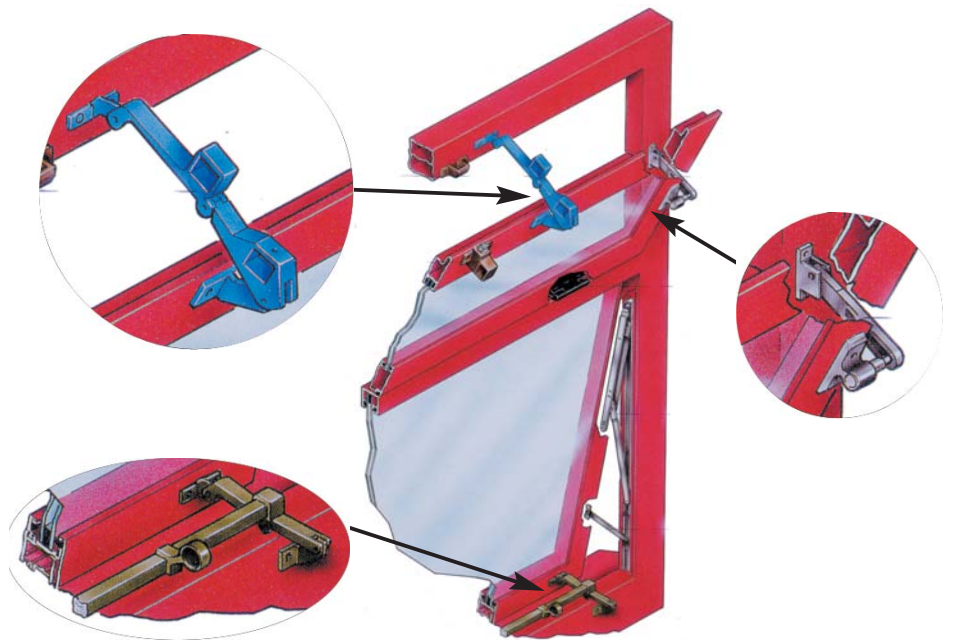

## Securistay

The Securistay is designed specifically with safety in mind & restricts window opening to 75mm (3"). It allows ventilation with security. Available in two finishes - white and brown. A special key is used to unlock/lock and can only be disconnected with the window is closed. It is available for wooden, metal framed and uPVC windows.

31-1335 - Wooden windows

31-1336 - Metal windows

**Folding Openers:** Folding openers are designed to make operation both smooth and reliable with guaranteed longevity for all applications. When used in a bar design, the folding openers allow easy grip and handling, particularly when used by a disabled or elderly people. The folding openers incorporate an over centre "snap" action to give positive closure. Optional locking features are also available.

## Folding Openers: Designs

**Standard.**

30-1063

**Extended**

30-1064

**Foldaside**

30-1064/F

**Releasable**

30-1064/R

**Locking**

30-1064/L

**Quadilent Stay:** These stays hold the sash window in the open position yet restrict the opening and have a degree of security when in the closed position.
