

6. Window Security

The Flush Pivot Lock is suitable for most wooden windows including casement, side hung, pivot, top hung and sliding. Each lock is supplied with a box keep in matching finish.

30-1100

The Snaplock can be used on most types of windows including casement, side hung or top hung. Closing the window locks the Snaplock automatically, the key is only required to unlock.

30-1090

The Lockable Stay in satin aluminium fits most wooden casement windows and completely replaces any existing stay. In addition, a second threaded peg provides maximum versatility in the secured open position. The wedged packing plates allow compatibility with tapered frames.

30-1060/1

The Sash Jammer is ideal additional security for uPVC windows. It is simple to operate and easy to fit, and is non-handed for use on all applications.

30-1120

Window Bolt is suitable for most types of wooden windows including casement, side hung, top hung and sash windows.
